EMMANUEL V. VILLONES

Ibaan, Batangas | emmanuelvillones25@gmail.com

SUMMARY

Analytical professional with a Bachelor of Science in Mathematics and nearly two years of experience across finance and risk operations. Experienced in data analysis, business reporting, data validation, and dashboard development using Excel, SQL, Google Sheets, and BI tools. Combines quantitative problem-solving with hands-on experience identifying trends, improving reporting processes, and communicating insights to support data-driven decisions.

WORK EXPERIENCE

Finance & Accounting Associate **March 2026 – July 2026**

Procter & Gamble Philippines Inc.

- Reduced the Asia Pre-QA report's average daily false-positive rate by 87.5% after investigating recurring flags, identifying outdated KNIME validation logic, and updating the workflow.
- Owned the daily Asia Pre-QA reporting process as SPOC, validating SAP invoice data and communicating results to AP teams and the department head.
- Processed 100–150 vendor invoices daily in SAP with 100% QA accuracy and full compliance with financial controls.

Risk Analyst **November 2024 – February 2026**

Kambi Philippines Inc.

- Managed 180+ recurring financial and risk performance reports across 30 client accounts in Looker, expanding coverage from 25 clients and configuring automated Power Automate workflows to meet reporting needs.
- Analyzed 40–50 player accounts daily in Looker, examining behavioral and betting patterns to identify trends, data inconsistencies, anomalies, and potential fraud.
- Built and maintained 5 KPI dashboards in Excel to track ticket-handling performance across department, team, and individual levels, supporting monthly and quarterly management reviews.
- Reduced unnecessary Customer Service to Risk escalations by 67% after analyzing historical JIRA tickets in Excel and developing and presenting a data-driven response guide.

EDUCATION

Bachelor of Science in Mathematics **August 2024**

Batangas State University, The National Engineering University

- **GWA:** 1.33 | **Cum Laude**
- Led a three-member thesis team applying computational algorithms and mathematical transformations to analyze multistationarity in carbon-cycle models.

TRAINING & PROJECTS

Data Analytics Bootcamp **July 2026 – September 2026**

Eskwelabs

- **Capstone:** Built and presented an end-to-end time tracking solution using Python, PostgreSQL, Power BI, and Google Apps Script, covering data processing, database management, visualization, and automated reporting.
